Professional Summary

Results-driven Software Engineer with nearly 4 years of experience in designing, developing, and delivering high-quality software solutions. Skilled in managing multiple projects, serving as the technical point of contact, and ensuring successful project execution. Adept at communicating effectively with cross-functional teams and stakeholders, with a proven ability to manage projects in the absence of a dedicated project manager. Known for strong problem-solving skills, attention to detail, and a commitment to achieving excellence in all deliverables.

Work Experience

Software Engineer

Rubico IT Private Limited, Haridwar | 01/2021 - Present

Key Responsibilities:

- Designed, developed, and deployed robust applications while ensuring adherence to project timelines and industry-standard coding practices.
- Collaborated with clients to gather requirements, address technical challenges, and deliver customized solutions aligned with their expectations.
- Facilitated clear and effective communication with stakeholders to ensure seamless project execution and timely delivery of milestones.
- Implemented comprehensive testing protocols to identify and resolve defects, ensuring high-quality, error-free deliverables.

Data Science Intern

RWX TECHNOLOGY, Haridwar | 06/2020 - 07/2020

- Contributed to machine learning and AI projects using Python.
- Developed expertise in Flask, NumPy, Pandas, Matplotlib, and OpenCV.

Internship

Diginique TechLabs | 06/2019 - 07/2019

- Worked on machine learning and deep learning algorithms.
- Created projects using OpenCV, TensorFlow, and other tools.

Education

B.Tech in Computer Science Engineering | College of Engineering Roorkee | 04/2017 - 09/2021

Intermediate | Kendriya Vidyalaya, Muzaffarnagar | 2016 - 2017

Matriculation | Kendriya Vidyalaya, Muzaffarnagar | 2013 - 2014

Technical Skills

Languages: WordPress, Python

Wireframe Tools: Balsamiq, Figma, Canva

Data Analysis tools: Excel, Numpy, Pandas

Others: AGILE, JIRA software, Requirement gathering, good communication and leadership skills, Client relationship skills

Projects

1. Peterson

Successfully migrated the Peterson project from an outdated server to a modern, robust infrastructure, ensuring minimal downtime and data integrity.

Identified and resolved major functionality issues caused by the previous service provider, enhancing system stability and user satisfaction.

Implemented best practices for server configuration and maintenance to prevent future disruptions.

2. ThursdayPool.com

Led the end-to-end development of ThursdayPool.com, building the website from the ground up with a focus on scalability and performance.

Managed cross-functional teams, ensuring timely delivery of project milestones and maintaining high-quality standards.

Delivered a fully functional, visually appealing website that aligned with the client's vision and business goals.

3. Media Fuel

Played a pivotal role in designing, developing, and deploying a large-scale website for Media Fuel Agency, starting from scratch.

Managed project timelines, resources, and stakeholder communications, ensuring smooth execution and delivery.

Oversaw technical architecture, ensuring the platform's scalability, security, and optimal performance.

Certifications

SQL (Basic) Certificate by HackerRank | 01/2022

Data Analytics, Machine Learning, and AI with Python | 07/2019

Machine Learning with Python by Microsoft | 11/2018

Languages

English: Professional Working Proficiency

Hindi: Native or Bilingual Proficiency

Interests

Writing (Quotes), Volunteering and Community Involvement, Photography
